

LOCKERS & SECURITY SYSTEMS

**IT'S NEVER TOO LATE FOR
24 HOUR FRESHNESS ...**

Chilled delivery lockers - there for you any time!

cool lockers

Chilled lockers are the latest trend!

1. Your customer orders goods **ONLINE** via your website, or simply by phone, or in person in your shop.
2. You prepare the goods and put them into a chilled locker for your customer.
3. At a convenient time your customer collects the goods from the locker – outside shop opening hours and without queuing at a till.

If the goods haven't been paid for in advance, the customer can pay at the delivery lockers.

24-hour delivery lockers

ADVANTAGES ...

... for your customer

- ✓ Up till now, delivery lockers were only suitable for non-perishable goods, but now there are chilled delivery lockers for foodstuffs, meat and sausages, or for party food.
- ✓ Customers can place and collect orders at times that suit their schedules.
- ✓ Your customer can collect the goods outside shop opening hours – stress-free and without any rush.

... for you

- ✓ Your store will be open 24 hours a day, seven days a week without the cost of extra staff or space.
- ✓ Chilled delivery lockers offer your customers flexibility and improved service – the ingredients for a closer long-term relationship.
- ✓ Delivery lockers increase your turnover and take the pressure off your employees.

24/7

**YOUR SHOP CAN NOW BE OPEN
ROUND THE CLOCK – 24 HOURS/
7 DAYS A WEEK!**

Maximum flexibility for customers

3

INCREASED SALES

Meet unmet customer demand

4

SUPERIOR CUSTOMER SERVICE

Fresh products - all the time

5

INNOVATIVE

Opportunity to lead the competition

STARTING POINT: OUR 10-LOCKER MODULE

The 10-locker module, with 4 large and 6 small lockers, is the best way to have an optimum start for your 24/7 shop.

Our 10-locker module		WIDTH (MM)	HEIGHT* (MM)	DEPTH (MM)
10L-Module	External	1370	2530	770
Inside dimensions	Large Locker	432	323	540
Inside dimensions	Small Locker	432	177	540

**Height includes cooling unit and plinth*

Module

A handover locker system consists of a user station and at least one locker module. Each module has two columns of lockers. We offer modules with a variety of locker sizes and locker combinations. Each locker module has its own individual cooling system, so that a delivery locker system can have a combination of chilled and freezer lockers.

This allows you to supply your customer's entire order, even if the items have different temperature requirements. All the locker modules can be combined with each other. The columns are controlled by our intelligent cool lockers software. *For information, the same modules can also be supplied without cooling, temperature-controlled, or even heated!*

Design

The modules are constructed from high strength, insulated, laminated panels. The doors are made of 3mm thick aluminium. All other parts are made of high quality stainless steel and plastic. The handover lockers can be supplied in a range of colours – also in special colours, of course, and in your personal corporate identity design.

The Advantages

- ✓ **Energy-saving** - only the modules being used are switched on.
- ✓ **Flexibility** - you can easily replace modules or add new ones.
- ✓ **No complete system failures** - if one cooling unit fails, the others continue to work.
- ✓ **Modular construction** - each module comes complete with its own cooling system.
- ✓ **Closed cooling system** - refrigeration specialists are not required at installation.
- ✓ **Additional turnover** - promotional materials can be placed in empty lockers to encourage the customer to make additional purchases.

Delivery procedure

Collection procedure

Collection process

During the order process online or when ordering in a shop, the customer is given an electronic collection code in the form of a PIN or barcode. This code is used at the lockers to collect the order.

Webshop connection

The system can be connected to your online shop or your server using established web protocols (e.g. SOAP, REST). If you have your own webshop solution, our software specialists will assist your team to connect the delivery locker system.

We offer smaller businesses their own Webshop. This allows you to profit very quickly and easily from our modern locker solution.

Do you need an even simpler solution?

You can also operate our handover lockers as a stand-alone system with no networking. This is particularly useful if you don't need many lockers. In this case, the customer orders and pays for his goods in the shop and receives a PIN code. He uses this PIN later to collect his goods from the locker system.

LockTec supplies intelligent locker solutions to the following sectors:

- Butchers
- Supermarkets
- Shopping Centres
- Repair Services
- Discount Chains
- Party Catering
- Pharmacies
- Luggage Storage

For almost 40 years, LockTec GmbH has specialised in the development and production of patented, practical locker solutions.

Our reputation speaks for itself – with more than 50,000 lockers installed in 27 countries, LockTec is widely recognized as the worldwide innovation leader in the field of electronic delivery lockers.
